

SIMATS ENGINEERING

CSA5110 - Cryptography and Network Security

ASSESSMENT TOOL 2

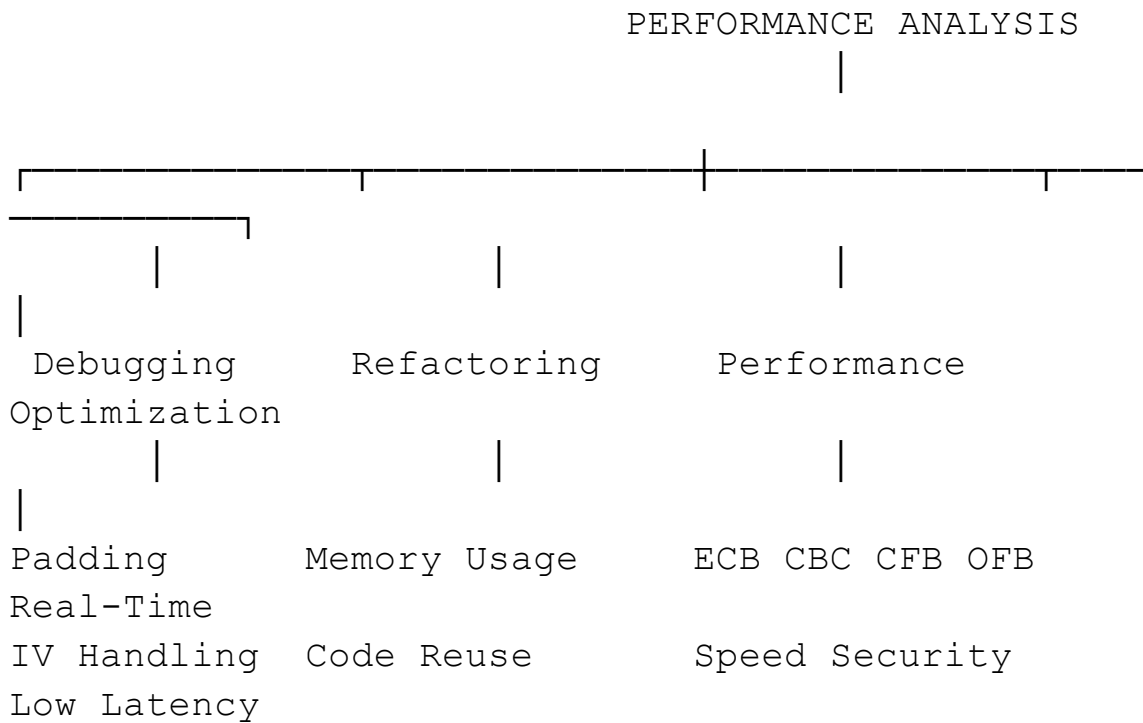

CONCEPT MAP REPORT

Question 2: Performance Analysis of Block Cipher Modes of Operation

Name: Noel Raju

Reg No: 192372315

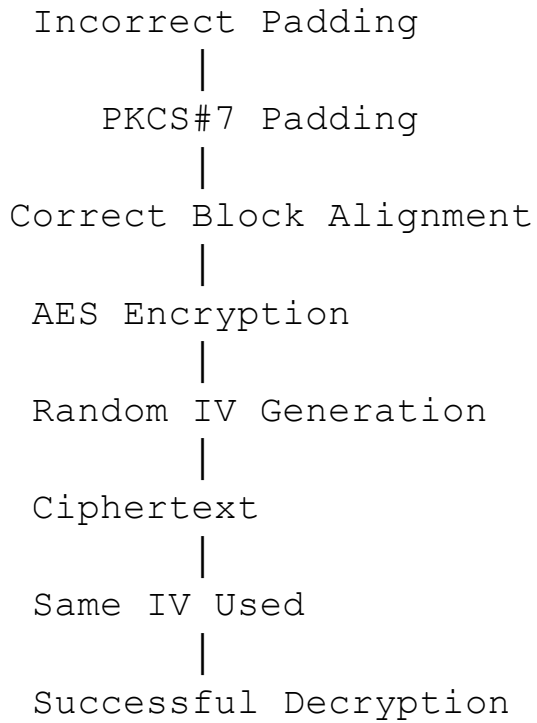

PAGE 1 - MASTER CONCEPT MAP

Explanation:

This concept map visually explains the relationships among the components involved in AES-like block cipher modes. Expand these diagrams further using Microsoft Word Shapes/SmartArt if required by your faculty.

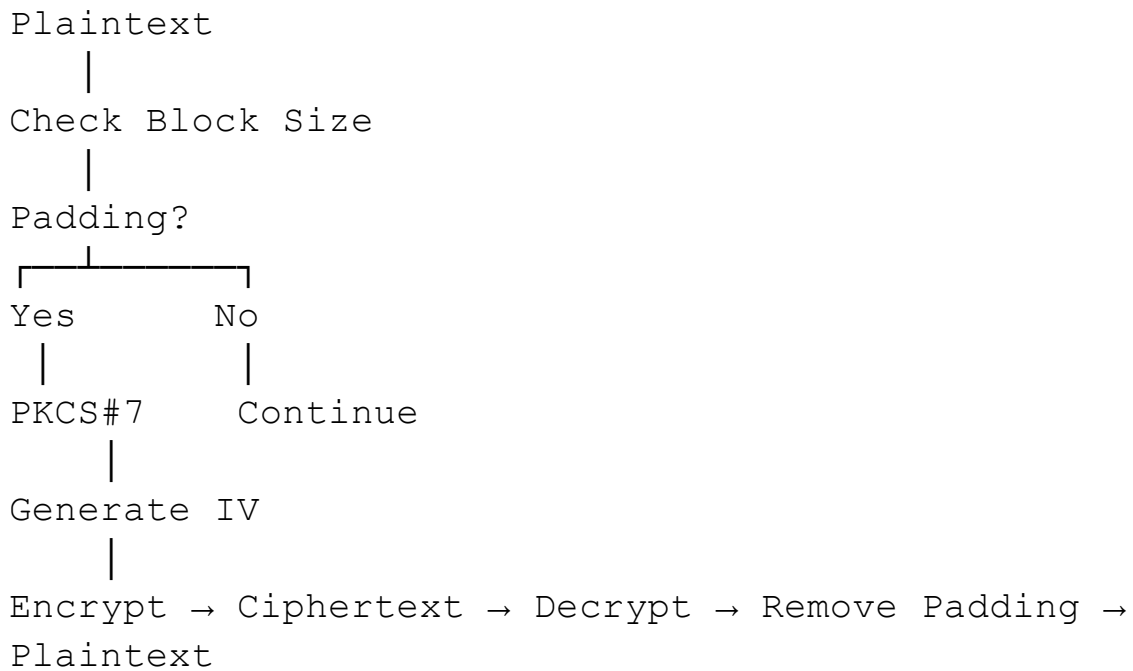

PAGE 2 - DEBUGGING MAP

Explanation:

This concept map visually explains the relationships among the components involved in AES-like block cipher modes. Expand these diagrams further using Microsoft Word Shapes/SmartArt if required by your faculty.

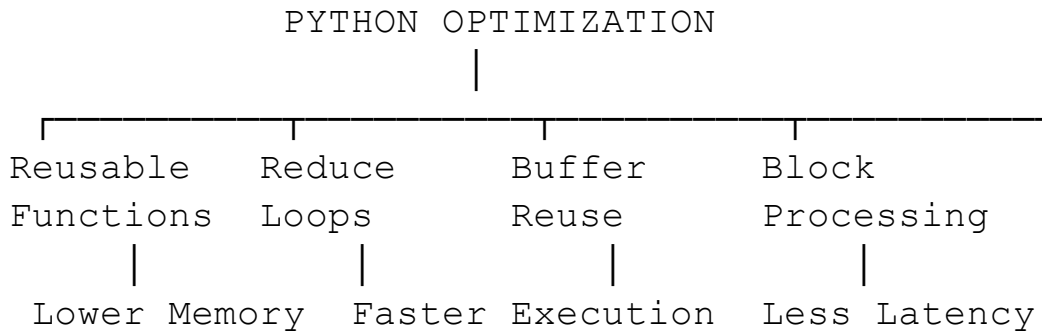

PAGE 3 - FLOWCHART

Explanation:

This concept map visually explains the relationships among the components involved in AES-like block cipher modes. Expand these diagrams further using Microsoft Word Shapes/SmartArt if required by your faculty.

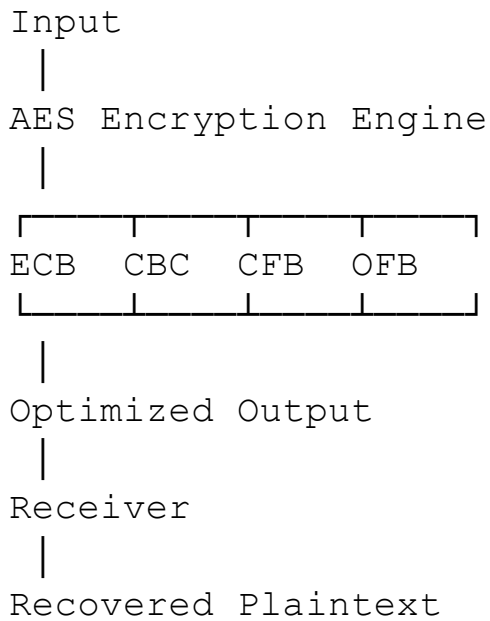

PAGE 4 - REFACTORING MAP

Explanation:

This concept map visually explains the relationships among the components involved in AES-like block cipher modes. Expand these diagrams further using Microsoft Word Shapes/SmartArt if required by your faculty.

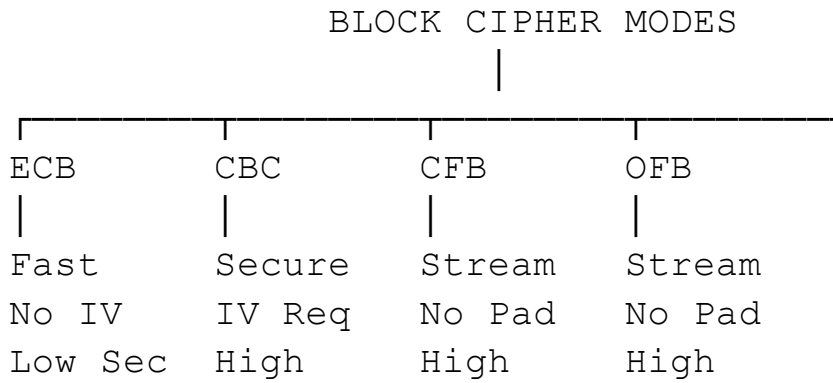

PAGE 5 - ARCHITECTURE

Explanation:

This concept map visually explains the relationships among the components involved in AES-like block cipher modes. Expand these diagrams further using Microsoft Word Shapes/SmartArt if required by your faculty.

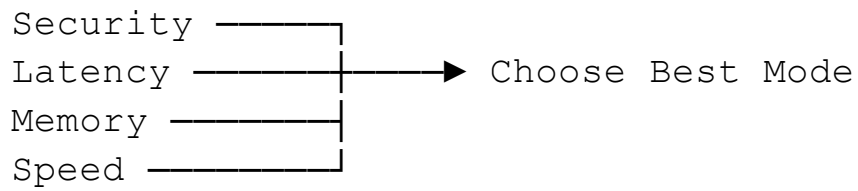

PAGE 6 - COMPARISON MAP

Explanation:

This concept map visually explains the relationships among the components involved in AES-like block cipher modes. Expand these diagrams further using Microsoft Word Shapes/SmartArt if required by your faculty.

PAGE 7 - DECISION MAP

CFB → Best for Real-Time

CBC → Best for Files

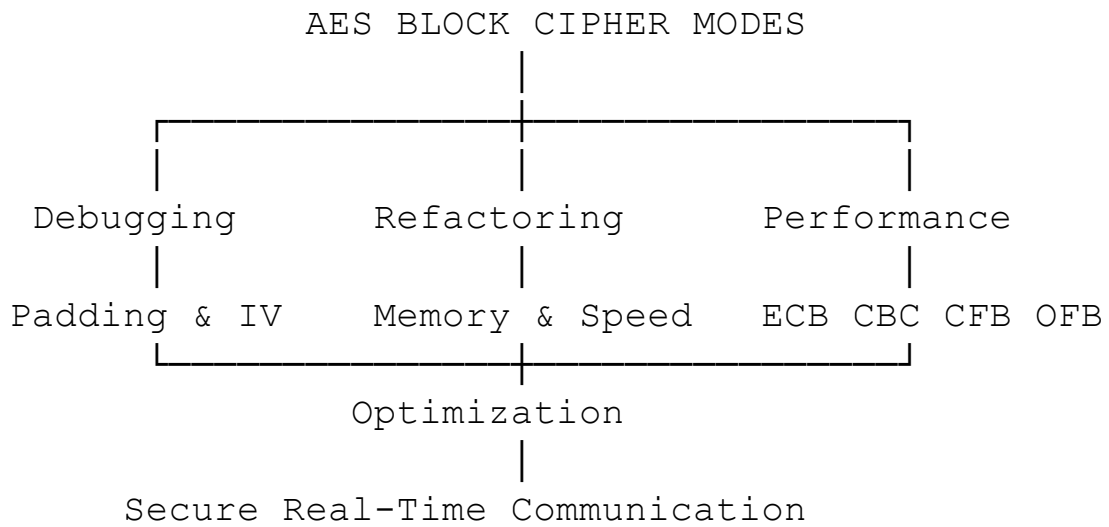

OFB → Noisy Channels

ECB → Not Recommended

Explanation:

This concept map visually explains the relationships among the components involved in AES-like block cipher modes. Expand these diagrams further using Microsoft Word Shapes/SmartArt if required by your faculty.

PAGE 8 - FINAL INTEGRATED MAP

Explanation:

This concept map visually explains the relationships among the components involved in AES-like block cipher modes. Expand these diagrams further using Microsoft Word Shapes/SmartArt if required by your faculty.
